

# INCITE

[Internet Community-based Interactive Technology Environment]

## **The World's First Interactive Contest for Industrial Application**

### **Who can enter?**

INCITE is a contest open by invitation only to all US FIRST Robotics Competition (FRC) teams. Only the first 50 teams to register will be eligible to compete.

### **What is it?**

Each team has the opportunity to create and submit up to five designs using given parts from 80/20 Inc. The theme for the contest is "Material Handling," and each design can cost no more than \$1,000 in materials.

### **When is it?**

Registration opens September 8, 2009 and will remain open until October 19, 2009. Teams can start designing upon registration, and the final date for submission of designs is December 10, 2009.

### **Where is it?**

INCITE is the world's first online interactive contest for industrial application. Using VizSeek's online industrial community networking platform, VizSpace, each team will create their own team VizSpace, and each team member will create a personal VizSpace. Team members can then use the *8020edge* widget to create designs that use parts from 80/20 Inc. and post them to their team's VizSpace. The team can then submit up to five designs to the contest.

All the submitted designs will be displayed in the contest's gallery in the 80/20 VizSpace, and VizSpace members will vote on the designs. The team with the most votes for its design will be the winner.

### **What are the prizes?**

The winning team will receive either the 80/20 parts to construct their design or a \$1,000 credit toward the purchase of 80/20 parts. The winning team will also have their picture and a picture of their project, constructed of 80/20 parts, featured in the *Made with 80/20 Stuff* book.
